

Connecting to T-Mobile Wireless Hotspot via iPhone

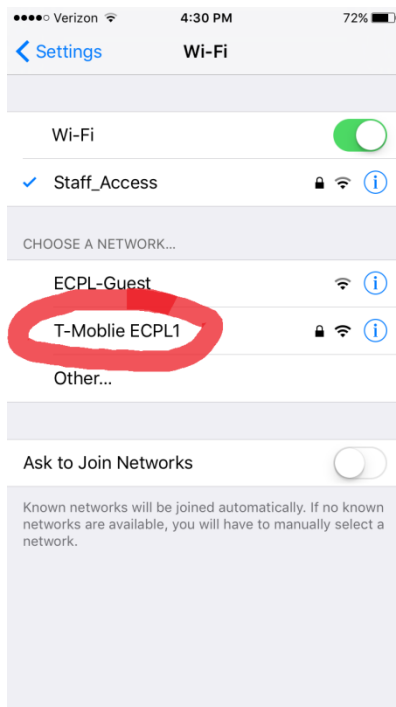

1. Access your settings application.

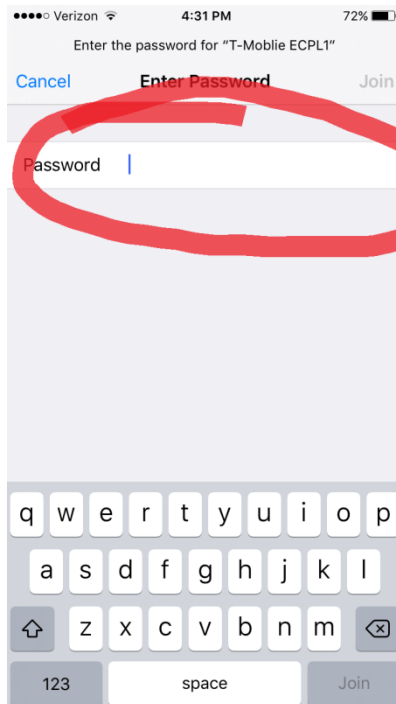

2. Press the Wi-Fi option.

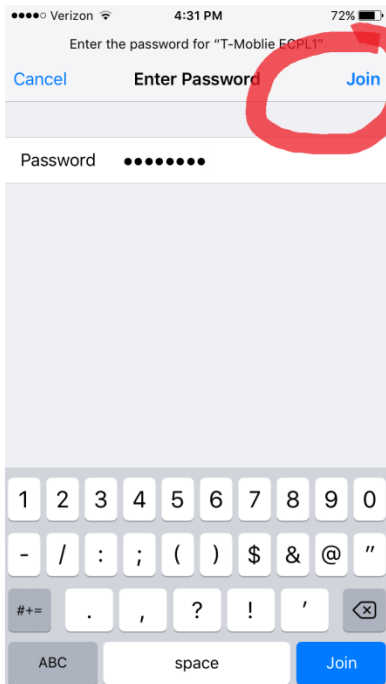

- Under “Choose a network...” the T-Mobile Wireless Hotspot will appear (if it is turned on). It should be named “T-Mobile ECPL#”. Press on it to select it.

- Enter the password for the given device.

- Once you have entered eight characters, the “Join” option will be available in the upper, right corner of the screen. Select it.

- If you entered the password correctly, your iPhone should connect to the wireless hotspot. The blue checkmark shown below will display if you are connected.
